

## Climatic Smart®

### The diagonal alternative for deciduous woods

#### Fine, diagonal meshes optimise passage of light

- growing space diameter: 14 cm, colour: black
- due to fine meshes, **protector keeps weeds (e.g. blackberry) out of growing space**
- **no growing-out of shoots through meshes**, better height growth

- durable (UV stable): 6 to 8 years, afterwards material (PE) decomposes environmentally neutral
- available as ready-to-use, pre-cut pieces (1.20 m, 1.50 m, or 1.80 m long) or as tube rolls of 100 linear metres – which allow you to determine the desired length of the protector tube individually
