

WitaPlant® Klima

WitaPlant® Klima features the advancement of the WitaPlant®-perforation in the upper section of the vine shelter which increases plant resistance

Growth promoting – special **perforation in the upper section** of the vine shelter provides for a **better transition** from the climate conditions in the unperforated, closed lower section of the shelter to climate conditions outside the shelter. Your plant becomes well prepared for the harsh “outside world”. **Plants which get in touch with the harsher outside climate through the holes in the shelter produce much greater benefits.**

NEW!

- with talons at the bottom (patented by witasek) that ensure especially stable hold in the ground
- Shelter **can be closed and re-opened** what makes it **easily reusable**
- **very large growing space**
(square, side length approx. 10 cm, **growing space diameter approx. 14 cm**)
- **greatly translucent** for strong growth and healthy plants
- Protects from game, **and from damage caused by mechanical and chemical (herbicides) weed control measures**
- no growing-out of side shoots, **thus less tying or cutting work necessary**
- **Keeps weeds and tendrils out of growing space**
- double layer material for temperature regulation
- droplet irrigation through dew in the hollow chambers of the material, **growth promoting**
- colour: transparent green
- durable (UV stable): 3 to 5 years, material (PP) decomposes environmentally neutral afterwards

Talons ensure a better hold in the ground
