

Cultivation and application rate recommendation

| FORESTS | Depending on the planting height and size of the root ball | Plants over 50 cm | heavy substrates or substrates with a high proportion of organic material | light permeable substrates e.g. high sand content |
|---|--|--|---|---|
| Reforestation: | 50 g / (100 g) | 100 g | X | X |
| Forest container plants | | 5–10 kg/m³ substrate | | |
| Container plants 10 g–20 g/litre (container > 2.5 litres): | | | 10 g per litre | 20 g per litre |
| <p>Root dipping: to protect plants from drought stress and heat for longer storage or transport</p> <p>→ Mix GroWit® Hydrogranulat with water at a ratio of 1:10 (e.g. 1 kg GroWit® Hydrogranulat with 10 litres of water), wait until the GroWit® Hydrogranulat has absorbed the water; immerse the root ball in the prepared gel for several seconds</p> | | | | |

NEW PLANTINGS FRUIT, VINE AND HORTICULTURE

for extreme soils up to 15 g/litre or 15 kg/ m³

Filling in layers should be avoided

GroWit® Hydrogranulat must always be well mixed with the surrounding substrate in the root area!

| GALABAU public GREEN | applied in the root area | heavy substrates or substrates with a high proportion of organic material | light substrates or Substrates with a high sand | |
|--|----------------------------|---|---|--|
| City tree plantings | 5–15 kg per m ³ | 5 kg per m ³ | 10 kg per m ³ | |
| Lawns | 100 g per m ² | gently work into the top 5–10 cm of soil or sand | | |
| Greenhouse (vegetables) | 100 g per m ² | gently work into the top 10 cm of soil | | |
| <p>Field crops: Single-seed sowing (e.g.: corn, soya, sunflowers): 20 – 30 kg/hectare applied to the furrow during sowing, application via micro-granule spreader (e.g.: as for starter fertiliser)</p> <p>Avoid application during periods of severe drought</p> | | | | |

SUBSTRATE ADMIXTURES

5 g – 10 g (5–10 kg/m³) GroWit® Hydrogranulat per litre substrate

→ 5 g: for heavy substrates or substrates with a high proportion of organic material

→ 10 g: for light, permeable substrates with, e.g., a high proportion of sand

Keep out of the reach of children and pets.
Store in a cool, dark and dry place.

Ingredients:
Lignin derivatives

individually approved in accordance with § 9 DMG 2021
